Product Description

BENEFITS OF THE BLACK SEED OIL

- Anti-Bacterial
- Anti-Inflammatory
 - Anti-Ulcer
- Anti-Cholinergic
 - Anti-Fungal
- Ant-Hypertensive
 - Antioxidant
- Antispasmodic
 - Antiviral

- Bronchodilator
- Gluconeogenesis Inhibitor (Anti-Diabetic)
- Hepatoprotective (Liver Protecting)
- Hypotensive
- Insulin Sensitizing
- Interferon Inducer
- Leukotriene Antagonist
- Renoprotective (Kidney Protecting)
- Tumor Necrosis Factor Alpha Inhibitor

These 22 pharmacological actions are only a subset of a far wider number of beneficial properties intrinsic to the black seed. While it is remarkable that this seed has the ability to positively modulate so many different biological pathways, this is actually a rather common occurrence among traditional plant medicines.

Black seed has been researched for very specific health conditions. Some of the most compelling applications include:

Type 2 Diabetes:

Two grams of black seed a day resulted in reduced fasting glucose, decreased insulin resistance, increased beta-cell function, and reduced glycosylated hemoglobin (HbA1c) in human subjects.

Helicobacter Pylori Infection:

Black seeds possess clinically useful anti-H. pylori activity, comparable to triple eradication therapy.

Epilepsy:

Black seeds were traditionally known to have anticonvulsive properties. A 2007 study with epileptic children, whose condition was refractory to conventional drug treatment, found that a water extract significantly reduced seizure activity.

High Blood pressure:

The daily use of 100 and 200 mg of black seed extract, twice daily, for 2 months, was found to have a blood pressure-lowering effect in patients with mild hypertension.

Asthma:

Thymoquinone, one of the main active constituents within *Nigella sativa* (black cumin), is superior to the drug fluticasone in an animal model of asthma.[vi] Another study, this time in human subjects, found that boiled water extracts of black seed have relatively potent antiasthmatic effect on asthmatic airways.

Acute tonsillopharyngitis:

Characterized by tonsil or pharyngeal inflammation (i.e., sore throat), mostly viral in origin, black seed capsules (in combination with *Phyllanthus niruri*) have been found to significantly alleviate throat pain, and reduce the need for painkillers, in human subjects.

Chemical Weapons Injury:

A randomized, placebo-controlled human study of chemical weapons injured patients found that boiled water extracts of black seed reduced respiratory symptoms, chest wheezing, and pulmonary function test values, as well as reduced the need for drug treatment.

MRSA:

Black seed has anti-bacterial activity against clinical isolates of methicillin resistant *Staphylococcus aureus*.

Opiate Addiction/Withdrawal:

A study on 35 opiate addicts found black seed as an effective therapy in long-term treatment of opioid dependence.

Sometimes the biblical reference to 'faith the size of a mustard seed moving mountains' comes to mind in connection with natural substances like black seeds. After all, do seeds not contain within them the very hope for continuance of the entire species that bore it? This super-saturated state of the seed, where life condenses itself down into an intensely miniaturized holographic fragment of itself, promising the formation of future worlds within itself, is the very emblem of life's immense and immortal power.

If we understand the true nature of the seed, how much life (past, present and future) is contained within it, it will not seem so far-fetched that it is capable of conquering antibiotic resistant bacteria, healing the body from chemical weapons poisoning, or stimulate the regeneration of dying insulin-producing beta cells in the diabetic, to name but only a fraction of black seed's experimentally confirmed powers.

Moving the mountain of inertia and falsity associated with the conventional concept of disease, is a task well-suited for seeds and not chemicals. The greatest difference, of course, between a seed and a patented synthetic chemical (i.e. pharmaceutical drug), is that Nature (God) made the former, and men with profit-motives and a deranged understanding of the nature of the body made the latter.

The time, no doubt, has come for food, seeds, herbs, plants, sunlight, air, clean water, and yes, love, to assume once again their central place in medicine, which is to say, the art and science of facilitating self-healing within the human body. Failing this, the conventional medical system will crumble under the growing weight of its own corruption, ineptitude, and iatrogenic suffering (and subsequent financial liability) it causes. To the degree that it reforms itself, utilizing non-patented and non-patentable natural compounds with actual healing properties, a brighter future awaits on the horizon. To the degree that it fails, folks will learn to take back control over their health themselves, which is why black seed, and other food-medicines, hold the key to self-empowerment.
